DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (claim 4) in the reply filed on 05/02/06 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Naito (6233268).

With respect to claim 1, Fig. 1 and 3 show a laser unit 7 comprising a shutter 22 having a reflective member 6 for reflecting a laser beam, a motor 19 for moving the shutter between a position in an optical path of the laser beam and a position out of the optical path (col.4, l.54-58), and a shutter position control 20 (control section) for commanding the motor 19,

wherein the laser unit comprises an encoder 23 for detecting a rotational position of the motor, the shutter position control 20 receives position data of the shutter by detecting a signal from the encoder and commands the motor based on the position data.

With respect to claim 2, col.4, l.54-58 and Fig.1 disclose the shutter intercepts the laser beam intended to progress out of the laser unit.

Art Unit: 2828

With respect to claim 3, col.4, l.54-58 and Fig.1 disclose the shutter changes the direction of progress of the laser beam inside of the laser unit.

With respect to claim 4, Fig. 3 discloses the laser unit comprises a judging device 20 (also the control section) for judging whether the shutter is operated according to a command from the shutter position control or not, the judging device limits a power supply 24 for laser excitation when the judging device judges the shutter to be not operated according to the command.
